## DECLARATION FOR METROPCS RECORDS

  
Security Compliance  

Re: CASE NO: 31E-MM-108062

TARGET NUMBER:  AND 

I, , hereby declare:

I am employed by MetroPCS Inc. and have been designated as Custodian of Records with responsibility for MetroPCS' compliance with the subpoena duces tecum, search warrant or court order.

The attached records are true copies of all the records described in the legal process (subpoena, search warrant, or court order). I personally have conducted or supervised compliance by MetroPCS with the subpoena duces tecum, search warrant or court order.

The records are either call detail or subscriber records, employee records, or other wireless records, depending upon the legal process (subpoena duces tecum, search warrant, or court order) request.

The subscriber records were prepared by MetroPCS personnel in the ordinary course of business at or near the time of the act, condition, or event. Account information is entered into the MetroPCS Billing System where the data is stored. The Custodian of Records retrieves the stored data from the MetroPCS Billing System via billing software for compliance purposes.

MetroPCS allows its customers' unlimited use of their services and therefore does not need call detail records for billing purposes. Call detail records are maintained solely for the purpose of complying with legal processes as mandated by CALEA. MetroPCS selected Verisign to store call detail records for the purpose of complying with legal processes as mandated by CALEA. Verisign is a secure third-party provider and is an active consultant to federal agencies and the Office of Homeland Security.

Call detail is recorded at the MetroPCS switch at the time of the event. MetroPCS makes it a regular business practice to have the records stored for the purpose of meeting requirements for assisting government agencies with lawful subpoena requests for subscriber records. The call detail is electronically transmitted to Verisign where the data is stored. Verisign provides a static IP address through a dedicated secure circuit for retrieval of these records. **The call detail files are maintained for approximately 6 months depending on size and quantity, after which they are automatically purged.**

☐ **Certification of No Records:** That a thorough search of our files revealed no documents, records or other material called for in the subpoena.

☒ Requested call detail records existed at one time but all or some of the records have since been purged.

I declare, under penalty of perjury, that the foregoing is true and correct.

Executed at Dallas, Texas on 9/24/06

  
Compliance Analyst

## Tips for Reading Call Detail

*Please read these tips thoroughly before calling with questions.*

*Thank you very much.*

---

BILLED PHONE	For outgoing calls, the number subpoenaed (target number). For incoming calls, from another MetroPCS customer.  <i>Note: An <u>incoming call</u> from another MetroPCS customer (MM under DIR) will generate <u>two records (rows)</u>. One record is for the MetroPCS subscriber calling the target number. The other record is for the target number receiving the call. SF 58, 59 and 63 also generates two records, of which one reveals the cell site.</i>
MARKET	The number of the market.
CALL DATE	The date of the call.
TIME	The hour, minute, and second the call was placed.
DIALED NUMBER	The actual number <u>dialed</u> by the caller (e.g. *67 for blocked caller id calls). <i>Note: SF 58, 59, and 63 automatically generates 3 extra digits in this column. These numbers are generated by the switch and not dialed by the subscriber.</i>
DEST NUMBER	The actual number <u>called</u> (destination number). The number receiving the call.
DIR	The direction of the call: ML – MetroPCS to Land (non-MetroPCS) LM – Land (non-MetroPCS) to MetroPCS MM – MetroPCS to MetroPCS
SF	A number indicating whether the call record was for a special feature. The most common special feature codes are 01, 58, 59 and 63: 00: No special feature 01: Call Waiting 53: Call waiting 54: Speed call 58: Voice mail deposit 59: Voice mail retrieval 63: Subscriber is receiving a call while traveling outside his home switch <i>Note: Records with SF63 is a routing record and numbers are subject to being misconstrued due to translations. A second record provides appropriate data for the subscriber.</i>
MM SS	The duration of the call in minutes and seconds.
CALLER ID	An incoming caller's phone number.
CELL	The cell site where the " <u>Billed Phone</u> " call was sent or received. <ul style="list-style-type: none"><li>- The letter represents the switch or market: Atlanta: (A, switch 1) (B, switch 2) Dallas: (L) Detroit: (D) Florida: (M,1) (N,2) (O, 3) (P,4) Tampa: (T) Sacramento: (S) San Francisco: (F, switch 1) (G, switch 2)</li><li>- The 1<sup>st</sup> number represents the sector (2, 3 or 4) [1, 2 or 3 in address list] 2 = North; 3 = Southeast; 4 = Southwest (generally)</li><li>- The last 3 numbers represent the number assigned the site</li></ul>

---

*Note: All attempted calls are recorded. Some calls are either abandoned or not completed, resulting in some incomplete records or 0 minutes and 0 seconds in duration.*
