

A 90-byte “whereis” program

 devblogs.microsoft.com/oldnewthing/20050120-00

January 20, 2005

Raymond Chen

Sometimes people try too hard.

You can download a [C# program to look for a file on your PATH](#), or you can use a 90-character batch file:

```
@for %%e in (%PATHEXT%) do @for %%i in (%1%%e) do @if NOT "%~$PATH:i"==" echo  
%~$PATH:i
```
