

Please refer to the instructions that don't exist

I bought myself a wireless mouse and was setting it up. Step 1: Insert the batteries. Check. Step 2: Position the receiver.

Make sure the distance between the mouse and receiver is within the wireless range specified on the packaging.

I wanted to put the receiver on the floor, off of my desk, so I had to make sure it would still be in range of the mouse on my desk. Let's look at the packaging. Nope, no mention of the receiver range.

I guess this proves that nobody reads the installation instructions.
