[You can use backups for things other than restoring](#)

A customer wanted to know the internal file format of Visual SourceSafe databases. (That wasn't the actual question, but I've translated it into something equivalent but ...

[How can I detect the language a run of text is written in?](#)

A customer asked, "I have a Unicode string. I want to know what language that string is in. Is there a function that can give me this information? I am most interested in...
