

# UNC2452: What We Know So Far

---

 [brighttalk.com/webcast/7451/462719](https://brighttalk.com/webcast/7451/462719)

## Presented by

---

Benjamin Read, Director, Threat Intelligence Analysis and John Hultquist, VP, Mandiant Threat Intelligence

## About this talk

---

Get the latest on UNC2452, the actor behind the SolarWinds supply chain compromise. FireEye's Mandiant team recently uncovered a threat actor leveraging a supply chain to carry out intrusions in a uniquely impactful campaign. The actor behind these intrusions, UNC2452, focuses heavily on operational security, which has limited historic perspective on their behavior and made them very difficult to detect; however, we are rapidly learning more about them. Join our Mandiant experts for this webinar where we will offer the latest intelligence on this important threat actor.
