Matt Bromiley Principal Consultant, Managed Defense; Andrew Rector Sr. Principal Security Analyst, Managed Defense

## About this talk

---

In December 2020, FireEye revealed the details of a sophisticated threat actor that took advantage of SolarWinds' Orion Platform to orchestrate a wide-scale supply chain attack and deploy a backdoor we call SUNBURST. This attack impacted organizations worldwide, leading executives everywhere to question whether their environment fell victim. For Mandiant Managed Defense, the identification of victims started even before the public became aware of the SUNBURST campaign. Join Matt Bromiley, Principal Consultant, Mandiant Managed Defense and Andrew Rector, Sr. Principal Consultant, Mandiant Managed Defense, for a first-ever look inside how Mandiant addressed the SUNBURST threat with customers, including stories from the front lines of this customer-focused response. Our experts will also highlight:

- How this prolific cyber attack changes the way we

view security • SUNBURST threat actor TTPs and how Mandiant hunts for the most relevant, and dangerous threats • What threat hunting techniques should be deployed to find today's stealthiest attackers Register Now!
