ThreatMon's CyberVolk Ransomware Technical & Malware Analysis Report is published! 📌
🔗 To access the full Report: <https://lnkd.in/eG-Wb8vJ> 🔍 CyberVolk Group is a threat actor group originating from India. It is one of the members of the Holy League organization, established by APT 44 and other Russian/Russian-aligned hackers to carry out attacks against NATO, Ukraine, and states opposing Russia. 🚫 CyberVolk Ransomware was developed by the CyberVolk Financially Motivated Threat Actor Group and released for sale as Ransomware-as-a-Service (RaaS) on July 1, 2024. After the initial version of the ransomware was leaked on VirusTotal, the CyberVolk group developed a new version and continued their RaaS services with this new version on July 10, 2024. 🛡️ The report provides a detailed analysis of [#CyberVolk](#) Ransomware, developed by the Indian-based CyberVolk Group, a member of the Holy League organization affiliated with Russian-aligned hackers.
