The hacker group **LulzSec Black**, in collaboration with **Jokeir 07x**, claims to have carried out cyberattacks on multiple targets in the **United Arab Emirates**. According to their announcement, they allegedly breached and took control of the databases of a government website, **skillset.eif.gov.ae**. The group stated that these attacks are in support of Palestine and are intended to retaliate against Arab countries they accuse of betrayal and normalization with Israel.

Additionally, LulzSec Black claims to have targeted **Alfa Electronics**, a leading company in the UAE specializing in appliances and lighting, with another breach. They allege that they have acquired the company's data, again in cooperation with Jokeir 07x. The group has warned of more intense attacks to come, suggesting that this is only the beginning.
