Did you know Windows has built-in RAM disk? Not just your regular RAM disk. It's pmem/nvdimm, via scmbus.sys built-in hack! That means you can make #dax volume, so data/image mappings (section views) will use "drive" directly! No data persistence; ws22/w11+. EZ create:

.

Make pmem/nvdimm #dax RAM, 0x1234_MB: cmd /v/c"set R=reg add HKLM\SYSTEM\CurrentControlSet\Services\scmbus /f /v&!R! CreateSimulatedRamdiskRootDevice /t 4 /d 1 &!R! RamdiskSizeInBytes /t 11 /d 0x123400000 &sc start scmbus" mb reboot; partite, and format X: /fs:ntfs /Q /L /DAX
